CAPABILITY STATEMENT

Patterson Arbor Company LLC.

PATTERSON ARBOR Co. LLC

Rooted in Family.

Patterson Arbor Company LLC is a Wichita-based provider specializing in high-stakes vegetation management. With over seven years of professional experience, including more than four years of dedicated high-voltage utility clearance, our firm provides safety-focused vegetation management for municipal, educational, and commercial clients. We apply utility-grade precision to every project, ensuring public safety and infrastructure integrity.

Core Competencies

- **Hazardous Tree Mitigation:** Specialized removal of high-risk vegetation in high-density urban zones and educational campuses. We prioritize the protection of adjacent physical assets and public safety through advanced rigging systems and site-specific safety plans.
- **Right-of-Way (ROW) Maintenance:** Comprehensive corridor maintenance for utility providers and municipal departments. Ensures regulatory compliance for road and utility access while preventing service interruptions through systematic vegetation control and clearance.
- **Emergency Storm Response:** 24/7 rapid mobilization for post-storm debris management and emergency clearance. Focused on the immediate restoration of public access, clearing primary transit routes, and securing hazardous limbs to support first-responder mobility.
- **Technical Pruning:** Technical pruning executed strictly to ANSI A300 and Z133 standards. We focus on the long-term structural integrity of the public canopy, reducing future liability and maintenance costs through science-based pruning and health assessments.
- **Utility Line Clearance:** Specialized vegetation management within the Minimum Approach Distance (MAD) of energized conductors. Our crews are trained in

high-voltage safety protocols to ensure grid reliability and prevent catastrophic fire or outage events.

Key Differentiators

- **Infrastructure Asset Protection:** Leveraging four years of utility-specific line clearance experience to safeguard government assets and ensure uninterrupted service continuity near energized conductors.
- **Operational Risk Reduction:** Professional-grade vegetation management that exceeds residential standards, utilizing a specialized baseline for safety to mitigate agency liability in high-density areas.
- **Safety Outcomes & Compliance:** Documented safety culture anchored in ANSI Z133 requirements, delivering thousands of high-risk work hours with zero lost-time incidents to ensure project site security.
- **Mission Support:** Wichita-based operations providing rapid mobilization and emergency response while directly supporting federal small-business socioeconomic procurement goals.

Past Performance

Client: Wright Tree Service (Utility Line Clearance) **Scope:** Utility Corridor Maintenance | **Location:** Wichita, Kansas | **Timeframe:** 2022 - Current

- **Complexity:** Manage vegetation for regional electrical cooperatives, maintaining Minimum Approach Distance (MAD) near energized conductors.
- **Magnitude:** Oversaw clearing for miles of utility right-of-way (ROW) ensuring zero service interruptions due to overgrown canopy.
- **Results:** 100% compliance with NERC/ANSI safety standards; zero safety incidents over 4 years of high-voltage operations.
- **Reference:** Anthony Borich | 515-903-7105 | HR10@wrighttree.com

Client: Wichita Tree Service **Scope:** Municipal Street Tree & Hazard Mitigation | **Location:** Wichita, KS | **Timeframe:** 2019 - 2022

- **Complexity:** Executed large-scale pruning and removals over public sidewalks and active roadways.
- **Infrastructure Benefit:** Ensured public safety and infrastructure protection through strict traffic control and structural pruning.
- **Results:** Successfully cleared hazards following major Kansas wind/ice events with rapid mobilization.
